

Bulk Promotional or Transactional SMS/Emails? We've got you covered.

Bulk SMS & Email Management is a powerful and easy tool for application-to-person SMS/Email messaging services. The hospital can alert patients, doctors, suppliers, vendors, hospital management, etc., on various transactions from Ellíder Hospital Information System installed at the hospital.

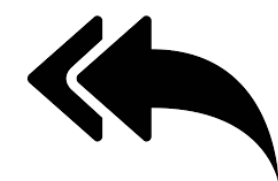

- Alerts for patients (Alerts on patient registration, appointment booking, cancellations, lab sample collections, result generation, bill generation, thank you messages, etc).
- Alerts for management (Daily transaction summary such as revenue alerts, visit details, etc.)
- Alerts for doctors (Panic alerts about patient status, insurance approvals, etc.)
- Alerts for vendors, suppliers, etc. (Transactions like stores requests, vendor alerts, etc.)

Transactional messages are delivered to all recipients irrespective of their Do-Not-Disturb (DND) status.

Automated SMS goes in a preset, standardized format adhering to the hospital's branding guidelines.

The hospital sends SMS through Internet Bulk SMS Services.

Other Features

- Easy and fast HTML editing GUI
- HTML source code editing
- Supports both plain text & HTML messages
- Stores e-mail communication history locally
- Merged E-mail view & SMS view
- E-mail attachment feature
