Hotsoft Hotel Management System

Hotsoft is a fully-integrated hotel management software that fulfills the core business needs of hotels up to 4-star category. With its extensive range of functionalities – provided across various modules – Hotsoft provides a foundation for growth, innovation and end-to-end business process excellence.

The software automates the recording and maintenance of master and transaction data, providing hotel personnel with real-time access to latest records and relevant information. Although offered as a suite of modules, each module can be deployed independently and still be integrated with optional interfaces to third-party systems. Added to this, a high degree of parameterization makes it possible to change the behavior of the system without making changes to underlying code. Currently, Hotsoft offers the below listed modules.

Key Modules

✅ Front Office Management	✅ Restaurant Management System	✅ Central Reservation System (CRS)	✅ Stock Control & Inventory Management System
✅ Finance Management	✅ Housekeeping Management System	✅ Laundry Billing and Management System	✅ Bar Billing & Beverages Management System
✅ POS TAB	✅ Banquets and Event Management System	✅ Food Cost Management	✅ SMS Management
