Management Information System Mobile Application (MIS Mobile App)

Management Information System Mobile Application brings the power of information system to the smartphones. The Android-based offering is a mobile extension of the web-based Management Information System supplied with Datamate's Hotsoft and Purple Keys Hotel Management Systems. The solution prepares, analyses and visualizes the data from hotel management system, and allows the end-users to identify actionable information from raw data, facilitating data-driven decision-making within the hotel. Some of the data the end-users receive from MIS Mobile App are listed below.

- Current day's occupancy details
- Next week's occupancy forecast
- Source-wise sales comparison for a chosen period
- Previous and current Financial Year revenue and occupancy comparison chart
- Top travel agents on the basis of sales
- Details of front office, restaurant and POS collection
- Revenue report with revenue from all modules, average room revenue, complimentary rooms, paid room details
- Room occupancy status
- Current day's arrival details
- Room availability chart for a selected period
- Room type-wise, agent-wise, country-wise comparison of sales
- Agent analysis with last and current financial year room nights
- Location-wise, group-wise, category-wise sales from POS
- Details of discounts allowed and complimentary bills
- Menu engineering study of items
- Finance Profit and Loss Comparison graph
