

Patient Portal

How to make your hospital website a one-stop platform for patients to access healthcare services and personal health information? Integrating Patient Portal with your hospital website makes this possible. Ellíder's Patient Portal extension provides a user-friendly online experience for patients and transforms the way they interact with the hospital and the care team.

Key Features

Easy and secure login

Login to the portal using email ID, mobile number, patient registration number, and any national ID like Aadhaar or Emirates card.

User-friendly dashboard

The patient can view their activities and access services from a simple, user-friendly dashboard.

Appointment booking with Payment

Book, edit and cancel appointments, view appointment history, pay for the consultation with ease.

Multi-clinic integration

Patients can book for appointments to doctors in connected clinics/branches of the hospital.

View investigation results

Track and download the investigation results like a lab result or radiology result from the portal and avoid visiting hospitals for the purpose.

Add family members

Connect spouse or child healthcare accounts and manage their healthcare services with ease.
