

## Patient Self-service Kiosk

Today, every hospital aims to endow its visitors with self-servicing solutions that can help visitors to address their needs by themselves. Adopting a self-service solution for tasks like appointment booking can help hospitals reduce resource dependency, optimize the process and increases efficiency. Datamate's interactive touchscreen kiosk software is one such self-servicing solution designed for hospitals. The Patient Self-servicing kiosk reimagines the entire lifecycle of patient registration to bill payment from the traditional stand-in-queue process.

### Why install Patient Self-service Kiosk

#### Eliminate long queue

The visitors do not have to stand in long queues for registrations or bill payments.

#### Increased productivity and efficiency

By removing the manual intervention, the solution simplifies the patient registration and billing processes, reducing the timeline and thus, leading to efficiency.

#### Enhanced patient satisfaction

Reduction in time, increase in speed and making the process completely paperless improves patient satisfaction quotient.

#### Cost optimization

Automation of process leads to a reduction in headcounts at the OP counters, leading to a reduction in operational cost.

### Key Features

#### Register as patient

Visitor can register as patient without the hassle of staying in the long queue.

#### Interfaceable with national IDs like Aadhaar card

Visitors can simply swipe their Aadhaar card to register as patient.

#### Transactions made easier

The visitor can do billing transactions related to registration, consultation, admission or discharge.
