

Queue Management System

Managing queues is a huge challenge for hospitals. Excessive queues can lead to dissatisfaction among visitors, which in turn can result in maligning the reputation of the hospital. Datamate's powerful queue management system software ensures a seamless solution for managing queues at various outlets of the hospital. The solution can be integrated with devices such as ticket dispenser, counter display, pole display or token display system, helping hospitals to deliver holistic visitor management.

Why install Queue Management System

- Eliminate long queues from all outlets
- Reduce visitor/patient waiting time
- Improve service delivery and efficiency
- Serve more visitors in less time
- Engage and entertain visitors with advertisements on signages

Key Features

Serve multiple outlets with a single solution

Display customizable, interactive messages and advertisements

Call/Recall tokens

Configurable alert tones

Add any number of display units and counters

Customizable to hospital requirements
