

## Vconsult Teleconsultation Solution

Ellíder's Vconsult Teleconsultation Solution powers hospitals with leading technology to deliver care remotely. The solution connects patients and physicians quickly and securely through video communication, expanding the access of care delivery to the convenience of both patients and doctors.

### Benefits for patients

#### Cost-saving

Consulting doctor through smartphone or laptop saves the transportation cost, parking charges and more.

#### Time-efficient

Besides saving the time to stand in the queue at the hospital and the risk of running into a traffic jam, the solution enables patients to consult physician during a work break.

#### Care at convenience

Having a doctor at dial anytime, anywhere is the most comfortable access to care.

#### Safer access to care during the time of pandemics like COVID-19

Hospitals are also the place for various illnesses. A video consultation is the safer option, especially for the vulnerable patients during trying times like COVID-19.

### Benefits for doctors

#### Improve patient engagement with remote consultation

Through anytime, anywhere access, doctors get the opportunity to review the patients' health remotely with ease, leading to better engagement and patient satisfaction.

#### Reach more patients

Teleconsultation is the right solution to deliver care to patients in rural areas and outside the standard care delivery systems.

#### Increase practice revenue

From the reduction in overhead cost, delivering treatment to more patients and time to cut-down in no-shows, teleconsultation improves not only the practice efficiency, but also the revenue.

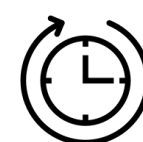

### Key Features
